

Directoria do Serviço Sanitario do Paraná

Curitiba, 7 de Janeiro de 1903

*Illmo. Snr. Dr. Secretario do Interior,
Justiça e Instrução Publica,*

Em observancia ao § 11 do Artigo 4.º do Regulamento do Serviço Sanitario, que baixou com o Decreto n. 101 de 31 de Março de 1898, vimos mais uma vez submeter a vossa judiciosa e esclarecida apreciação o Relatorio da repartição a nosso cargo.

Não obstante nos ter visitado, em Fevereiro do anno p. passado, a peste bubonica, de ter apparecido alguns casos de croup e dous de esçarlatina (formula benigna), podemos affirmar que as condições sanitarias, durante o anno, a que nos referimos, foram bem satisfatorias, visto terem sido estas molestias extintas antes de se desenvolverem e causarem calamidade na população do Estado.

Sendo a peste bubonica um estado morbido cujo apparecimento tanto pavor tem trasido a população que se vê a braços com ella, entendemos acertado diser alguma cousa a esse respeito.

A peste bubonica de hoje está bem longe de ser aquella que na Asia e na Europa devastou cidades inteiras, causando, segundo Hecher, 48 milhões de victimas em um só anno (1348).

Ella actualmente apresenta-se debaixo de uma forma grave e marcha galopante, nos casos bem caracteristicos, mas o numero de victimas é muito menor do que o de qualquer outra molestia pestilencial.

353 542
1223
1901-1902

Tivemos occasião, em Paranaguá, de estudal-a bem de perto, apreciando minuciosamente e com todo o cuidado sua invasão, sua marcha, sua duração e sua terminação. Também tivemos occasião de estudar a acção do serum curativo Yersin, e os phenomenos produsidos pelas vaccinas anti-pestosas de Haffkine de e Terni.

Empregamos mesmo como meio preventivo o proprio serum curativo de Yersin, as pessoas que habitavam a mesma casa em que se tinha manifestado a molestia, com o fim de tornal-as immediatamente immunes, visto a acção preventiva dos seruns vaccinicos de Haffkine e Terni, que perduram por mais tempo, só se manifestar oito dias depois de serem inoculados, ficando deste modo os individuos sujeitos a contrahir a molestia durante aquelle lapso de tempo.

Mas attendendo que a vaccinação com o serum curativo immunisa apenas por oito dias, enquanto que o serum vaccinico propriamente dito premune por seis a oito mezes, preferimos fazer a vaccinação mixta dos dous serum simultaneamente.

Os casos de peste bubonica que tivemos occasião de observar manifestaram-se debaixo de duas formas: ganglionar e pneumonica.

Na forma ganglionar o doente se apresenta com todos os symptomas de uma adenite bastante dolorosa. E no fim de uns quatro ou seis dias os tumores ganglionares começam a supporar, o doente apresenta melhoras accentuadas, mas no fim de umas 24 horas, estas melhoras desapparecem para darem lugar a symptomas incendiarios que em poucos minutos victima o enfermo.

Na forma pneumonica o doente não apresenta bubom algum, apenas manifesta-se em um estado febricitante, com todos os caracteres de uma infecção palustre grave, que se mantem por uns quatro ou seis dias, apparecendo então uma forte pontada na região precordial, acompanhada de uma pertinaz dyspnéa e de todos os symptomas de uma pneumonia grave, terminando pela morte em poucos momentos.

Deante deste quadro assustador, não podendo confiar grandemente no exame clinico, extrahimos o succo do bubom de um doente moribundo e examinando-o ao microscopio, pareceu-nos descobrir o cocco bacillo da peste bubonica. Mas não confiando na nossa competencia em bacteriologia, pedimos ao Exmo. Snr. Dr. Governador que mandasse um medico, que com mais habilidade, viesse encarregar-se das experiencias microscopicas

No dia seguinte S. Exa. commissionou o Snr. Dr. Petit para encarregar-se desse estudo, tendo sido acompanhado pelo nosso distincto e incansavel auxiliar o Snr. Dr. Antonio Candido de Leão. O Snr. Dr. Petit examinou a preparação que haviamos feito, e confirmou a existencia do cocco bacillo bubonico.

Foram feitas mais tarde novas preparações com o succo extrahido de bubons, com o sangue de cadaveres e com o succo de cobayas, previamente inoculados, tendo todas estas experiencias igualmente confirmado a existencia do cocco bacillo pestoso.

Antes porém de ter-se chegado a este ultimo resultado, tendo cahido enfermo no dia 4 de Março o cidadão Pacifico de Sousa, fomos convidados ás 6 horas da manhã do dia seguinte para medical-o.

Examinando o doente e procurando saber a sua anamnese, elle nos referiu que havia ingerido uma grande quantidade de alimentos e fructos ás 11 horas da noite, e que passára muito afflicto até a madrugada, tendo tido bastante nauseas. Em presença destes dados diagnosticamos uma perturbação gastro intestinal.

Attendendo porém que o doente era um homem de cor parda, de 40 annos de idade, robusto; considerando ainda, que a ingestão do alimento havia sido feita já ha muitas horas, devendo por conseguinte já ter uma grande parte deste alimento percorrido uma boa extensão do tubo gastro-intestinal, não trepidamos em administrar-lhe uma poção emeto-cathartica, que produziu-lhe grandes melhoras.

Na tarde desse mesmo dia receitamos uma poção carminativa com sulfato de sodio.

No dia 6 ás 6 horas da manhã o doente tinha febre; o pulso pequeno e muito frequente, tornára-se indifferente a tudo que lhe cercava, respondendo com difficuldade as perguntas que lhe eram feitas.

Foi-lhe administrado umas capsulas de valerianato e sulfato de q. q. e vinho quino de Labarraque. Tornamos a visitar o enfermo ao meio dia e notamos phenomenos ataxo-adynamicos bem pronunciados. Não acreditando que se tratasse de um caso de febre typhoide, mas sim de um caso bem suspeito de peste bubonica, attendendo a marcha da molestia, fizemos então uma injeção de 40 c. c. do serum curativo de Yersin, apesar de ainda não ter sido declarada experimentalmente e de um modo positivo a existencia da peste em Paranaguá.

Meia hora depois da injeção o enfermo apresentou melhoras bem accentuadas, mas as seis horas da tarde encontramol-o no mesmo estado em que se achava pela manhã, accusando, ainda mais, uma dor na região inguinal esquerda, onde notamos um pequeno tumor, mui doloroso pela pressão. Em vista da gravidade do caso fizemos uma segunda injeção de 60 c. c. de serum curativo. Reappareceram as melhoras que se mantiveram durante a noite.

No dia 7 ás 6 e meia horas da manhã o doente continuava melhor e mais animado, a temperatura tinha baixado a 38°, o pulso tornára-se mais regular, o tumor menos doloroso e de menor volume.

Fizemos então uma terceira injeção com 20 c. c. apenas. Durante o dia o enfermo conservou-se em boas condições, parecendo mesmo que iria melhorar definitivamente, porém ás 9 e meia horas da noite peiorou rapidamente, voltando a dyspnéa e os phenomenos ataxo-adynamicos, respondendo com muita difficuldade as perguntas, procurando comprimir com a mão o tumor inguinal, que se tornára muito doloroso.

Apesar de considerarmos o doente perdido, injectamos 60 c. c. de serum, que não produsiram melhoras algumas, vindo o doente a fallecer á 1 hora da manhã do dia seguinte.

Escusado é diser que as injeções foram feitas com todos os preceitos indicados pelos competentes na materia. Fazemos esta succinta descripção, sem termos a pretensão de consideral-a uma observação clinica, pois que não nos referimos a todo quadro symptomatologico com que a doença se apresentava, visto não nos ser permittido alongar demasiadamente o nosso relatorio.

Entretanto o que fica dito, será sufficiente para se fazer uma juizo mais ou menos exacto sobre a natureza da esquizita molestia que appareceu em Paranaguá nos primeiros mezes do anno proximo passado. Innumeras foram as difficuldades em que nos vimos envolvidos para enfrentar com tão terrivel inimigo, e teriamos mesmo sido vencidos se não fosse a sollicitude com que o Exmo. Snr. Dr. Governador do Estado veio em nosso auxilio, attendendo com a maior prestesa a todas as nossas indicações, e ordenando-nos que passasse

mos em pratica todas as medidas sanitarias, sem a menor restricção, que tentassem exterminar tão terrivel mal.

Por sua vez o Snr. Dr. Octavio do Amaral, Secretario do Interior, foi incansavel em nos auxiliar, nem só, nos facilitando todos os meios necessarios e pondo a nossa disposição o numerario que fosse preciso para as despesas de prompto pagamento, como tambem muitas vezes abandonou sua secretaria para assistir, em pessoa, á compra e ao embarque de diversos pedidos que de Paranaguá faziâmos ao Governo do Estado.

Devemos diser que, quando nos dirigiamos para o littoral, a nossa reparição dispunha apenas de um pulverizador de Genest & Herscher e um outro inservivel.

Mas o Exmo. Snr. Dr. Governador providenciou de um modo tão acertado que poucos dias depois já tinhamos duas estufas locomoveis e mais dous pulverizadores dos mesmos autores acima citados; tinhamos uma grande quantidade de serum curativo Yersin, vaccina anti-pestosa de Terni e Haffkine, lampadas Esculape, formalina, kresolina Werneck, potassa caustica, bichlorureto de mercurio e diversos outros desinfectantes.

Dispondo de todos estes elementos atacamos corajosamente o inimigo, fazendo izolar e vaccinar todas as pessoas que tiveram contacto com os enfermos, mandando faser desinfecção rigorosa e mais beneficiações sanitarias nos domicilios em que se deram os obitos. Os enterramentos foram todos assistidos por nos, os caixões eram completamente fechados, forrados pelo lado interior com uma tela embebida em fortissima solução de decinfectantes, e exteriormente untados com uma expessa camada de alcatrão. As sepulturas eram profundas e continham uma grande camada da cal virgem que envolvia todo o caixão.

Tivemos todo o cuidado com o pessoal deste serviço e em cada enterramento eram incineradas suas roupas e substituidas por outras novas.

Apesar da prevençào que o povo tinha contra a vaccina anti-pestosa, conseguimos vaccinar 585 pessoas cujos nomes constam de uma lista junta deste relatorio. Foram estas as occurrencias mais importantes que se deram durante o anno findo. Em quanto o resultado das investigações bacteriologicas feitas pelo Snr. Dr. Petit, já vos enviamos relatorio que tratava detalhadamente sobre este assumpto.

Não devemos terminar esta parte do nosso relatorio sem nos referir ao relevante auxilio que nos prestou, durante esta titanica lucta, o distincto e illustrado Prefeito de Paranaguá, o Snr. C.^{el} Theodorico Julio dos Santos. A sua dedicação aos habitantes daquella cidade, foi de tal modo que, alem de ter posto a nossa disposição todo o pessoal subalterno da Camara, soccorreu com a maior sollicitude as familias pobres, que se viam a braços com a terrivel molestia. Eramos procurados constantemente pelo Snr. Prefeito afim de prestar-nos o seu valioso concurso, o que concorreu grandemente para o bom exito da causa que juntos defendiamos.

Não devemos igualmente esquecer a importancia dos sabios conselhos e a competencia do distincto Medico Municipal, o Snr. Dr. José Justino de Mello, que foi um luctador incansavel.

Os dous casos de escarlatina benigna e alguns outros de croup que tem apparecido, não tomaram proporções epidemicas, tendo sido feito desinfecções rigorosas.

Sempre que nos tem sido notificado casos de molestias epidemicas, temos mandado faser as desinfecções nos domicilios e submeter as roupas aos vapores comprimidos das estufas de Genest & Herscher; mas acreditamos que nem todos os casos nos tem sido notificados e não podendo nos adivinhal-os, a responsabilidade recahirá sobre quem os occultar, se por uma fatalidade a molestia se desenvolver epidemicamente.

Não vem fora de proposito lembrarmos ao Governo a inconveniencia de achar-se o material de nossa repartição espalhado por diversos pontos por falta de um modesto desinfectorio, onde se poderia collocar as estufas, que se acham em um barracão, os pulverisadores e desinfectantes que estão mal acomodados na Inspectoria, sujeitos a damnificarem-se. Resulta de tudo isto uma enorme difficuldade para reunir-se todos estes elementos, affin de faser-se as desinfecções precisas. Acrescentando-se ainda a circumstancia de que, em geral, só nos communicam a existencia de molestia contagiosa, depois de ter o doente fallecido, não havendo tempo para tomarmos todas as precauções que a facto exige.

Tambem devemos diser que no Lasareto de S. Roque, que é um edificio bem aproveitavel, deve-se faser alguns reparos urgentes, taes como: concertar as paredes principaes que se acham fendidas, substituir as infectas latrinas que estão na enfermaria, collocando-as em lugar mais apropriado; substituir a bomba d'agua, que está estragada, por outra moderna que forneça facilmente abundancia d'agua, que é o principal elemento em um estabelecimento desta ordem; dotar o Lasareto com um telephone para se poder attender aos chamados de urgente necessidade, concertar a estrada que actualmente se acha em estado deploravel. São estas as indicações que julgamos do nosso dever lembrar ao Governo.

Deixamos propositalmente a estatistica demographico-sanitaria para ultimo lugar, porque julgamos que ella é, como já tivemos occasião de diser, a pedra de toque por onde se poderá aquilatar das vantagens das indicações hygienicas.

Indubitavelmente temos empregado todos os nossos esforços e boa vontade para dotar o Estado com uma estatistica demographico-sanitaria, quando não fosse uma obra prima, pelo menos que pudesse satisfazer ao fim a que são ellas destinadas.

Mas a nossa estatistica ainda fica muito aquem do que desejavamos apresentar a vossa sabia apreciação, e isto só é devido aos Srs. Escrivães Districtaes que não tem querido corresponder aos nossos repetidos appellos enviando-nos dados demographicos. Alem da demora da remessa destes dados demographicos, (o que nos obrigou a organizar a estatistica de Julho a Junho seguinte), ha Escrivães que nunca forneceram dados alguns e outros tem se limitado a mandal-os de alguns mezes, com diseres errados e incompletos, a despeito de lhes serem enviados mappas impressos, tendo elles apenas o trabalho de encher-os.

Alguns Escrivães, recém-nomeados, nos tem communicado não terem encontrado apontamentos referentes a estes dados, facto este que grandemente vem prejudicar a população dos referidos districtos. Pelos mappas estatisticos que acompanham este relatorio, podereis verificar a inexactidão dos dados que nos são fornecidos pelos Escrivães de alguns municipios, cuja população é de 3 a 10 mil habitantes e que entretanto registraram apenas 0 e 14 nascimentos annuaes!

Não obstante todas estas contrariedades, vamos fazer um apanhado, procurando salientar os factos mais notaveis da nossa estatistica.

Verifica-se segundo os dados que nos foram fornecidos, que durante o anno da nossa estatistica (Julho de 1901 a Junho de 1902) registraram-se em todo o Estado 5642 nascimentos, mais 690 que o anno passado, dando a media diaria de 15,45 e correspondendo a 17 nascimentos por 1000 habitantes. Foram do sexo masculino 2835 e do femenino 2807. De paes brasileiros 3638, paes estrangeiros 1650, mestiçados 354. Filhos legitimos 4878, e illegitimos 764.

Houveram 1561 casamentos (mais 300 que o anno passado) dando a media diaria de 4,27, correspondendo a 4,78 casamentos por mil habitantes.

Verificaram-se durante o anno estatistico 2922 obitos (mais 359 que o anno passado) dando uma media de 8 e correspondendo a 8,8 por mil habitantes. Foram do sexo masculino 1496 e do femenino 1426. Verifica-se mais uma differença de 28 nascimentos a favor do sexo masculino, mas em compensação houve uma differença de 70 obitos contra este sexo, dando em ultimo resultado uma differença de 42, entre os nascimentos a obitos, a favor do sexo feminino. Devemos notar que no numero de obitos figuram 2628 brasileiros, 285 estrangeiros e 9 de nacionalidades ignoradas; eram 1976 solteiros, 665 casados, 239 viuvos e 42 de estados ignorados.

Verifica-se que até a idade de 5 annos registraram-se 1397 obitos, quasi metade do obituario total.

Tomando-se a differença entre os nascimentos e os obitos verifica-se o coefferente de 2720 habitantes a favor da população do Estado. Terminando devemos explicar porque falleceram neste anno estatistico, mais 359 pessoas que no anno passado, sem que houvesse epidemia que justifique este facto. É natural que o obituario cresça visto ter sido a população augmentada nem só porque o registro de nascimentos cresceu de 2720 pessoas como tambem porque a população fluctuante (entradas e sahidas de passageiros) tem dado sempre uma differença a favor da população do Estado. Alem destas ponderosas rasões, Paranaguá o anno passado só nos forneceu obitos de cinco mezes, enquanto que neste anno nos forneceu de dose mezes. Tambem temos recebido este anno dados demographicos de alguns Districtos, que até então não nos haviam mandado.

Eis tudo quanto temos a vos relatar referente ao anno findo. Terminando o nosso relatorio não podemos deixar de louvar o zelo e aturado trabalho que tem tido o Snr. Ricardo Negrão Filho, Secretario desta Repartição, na organização des mappas estatisticos, e o empenho que tem mostrado em nos auxiliar para levarmos avante tão ardua tarefa. Tambem tem sido solícito no cumprimento de seus deveres o Snr. Alfredo Vianna, amanuense sanitario e os demais empregados da Repartição a nosso cargo.

Foram concedidas as seguintes licenças de Praticos Pharmaceuticos:

- Militão Pujol, para a cidade de Paranaguá.
- José de Sousa Bueno, para São José da Boa Vista.
- Manoel José Ribeiro, para Sant'Anna do Itararé.
- Pedro Violani, para Villa Colombo.
- Francisco Adalberto Dibowez, para Guarapuava.
- Pedro Gabardo, para drogaria na Villa Colombo.

Diversas licenças

Foram concedidos para venda de preparados approvados por esta Directoria as seguintes:

- A' Manoel Francisco Corrêa Netto, para expor a venda o seu preparado denominado «*Milagrina Dentaria*».
- A' Arthur Victor de Sá, para seu preparado denominado «*Necrob.*».

Inspeção de Saude

Foram effectuadas as seguintes:

- José Olibio Lopes, Telegraphista, 13 de Janeiro.
- Octavio E. Machado Lima, Contador dos Correios, 19 de Abril.
- Antonio Manoel de Godoy, Telegraphista, 21 de Junho.
- João Venancio Coelho, Telegraphista, 9 de Julho.
- Luiz Carneiro da Silva Braga, Telegraphista, 4 de Agosto.
- Major Custodio Gonsalves Rollemberg, Official da Policia, 12 de Agosto.
- Joaquim Dinarte de Camargo, Professor, 18 de Setembro.
- Antonio José de Freitas, Porteiro da Secret. de Finanças, 27 de Setembro.
- Octaviano Eugenio de Mello, Telegraphista, 24 de Outubro.

Officios

Foram expedidos durante o corrente anno 118 officios e circulares, sendo:

- Ao Dr. Secretario do Interior 39
- Aos Escrivães Districtaes 27
- Diversos 52 — 118.

Impressos

Foram enviados 1796 impressos de obitos, nascimentos e casamentos aos 60 Districtos do Estado.

Requerimentos

Foram apresentados a despacho 18 requerimentos assim classificados:

- Pedindo licença para pharmacia 11
- Approvações de preparados 2
- Diversos 5 — 18.

Dr. Randolpho Pereira Serzedella
Director do Serviço Sanitario.

População do Estado 330 898 habitantes. População da Capital 50 124 hab.

Nascimentos

Registraram-se durante o corrente anno estatístico, no Estado, 5642 nascimentos ou mais 690 que no anno estatístico proximo passado, dando uma media diaria de 15,45 e correspondendo a 17 nascimentos por mil habitantes.

Os Municipios em que mais nascimentos registraram-se foram os seguintes:

Capital	1781	correspondendo a	35,13	por mil habitantes
Guarapuava	439	»	20,16	»
Campo Largo	245	»	22,83	»
Antonina	234	»	35,35	»
S.J. dos Pinhaes	231	»	15,38	»
Morretes	223	»	37,50	»
N. Alcantara	220	»	59,37	»
Castro	219	»	18,82	»
S. J. Triumpho	184	»	15,41	»

dos nascimentos foram:

Legitimos 4878, illegitmos 764.
De Paes nacionaes 3638, de Paes estrangeiros... 1650.
Mae nacional e Pae estrangeiro 273, pae nacional e mae estrangeira 77, paes desconhecidos 4.
De dia 3327 De noite 2315.

Casamentos

Realisaram-se 1561 casamentos em todo o Estado, ou mais 300 que no anno proximo passado dando a media diaria de 4,27 correspondendo a 4,71 casamentos por mil habitantes.

Os Municipios em que mais casamentos se realisaram foram os seguintes:

Capital	268	correspondendo a	5,34	por mil habitantes
Guarapuava	144	»	6,59	»
S.J. Triumpho	77	»	6,44	»
Campo Largo	72	»	6,73	»

Lapa	65	»	3,25	»
Imbituva	60	»	5,22	»
S.J. dos Pinhaes	58	»	3,92	»
Araucaria	57	»	8,29	»

Dos casamentos foram:

Entre solteiros 1409, viuvos e solteiros 92, solteiras e viuvias 36, viuvos 24.

Entre nacionaes 1266, estrangeiros 180, nacionaes e estrangeiras 44, estrangeiros e nacionaes 71.

Obitos

Verificaram-se no referido periodo 2922 obitos, ou mais 359 que no anno proximo passado, produzindo a media diaria de 8 correspondendo a 8,83 obitos por mil habitantes.

Os Municipios que mais obitos registraram-se foram os seguintes:

Capital	672	correspondendo a	13,40	por mil habitantes
Paranaguá	346	»	34,	»
S.J. da Boa Vista	176	»	19,53	»
Antonina	161	»	24,31	»
Morretes	150	»	25,22	»
Guarapuava	136	»	5,99	»
S.J. Triumpho	123	»	10,30	»
Lada	119	»	5,96	»
Nova Alcantara	108	»	9,14	»
Ponta Grossa	105	»	12,36	»
Guaratuba	94	»	35,02	»

As molestias que mais predominarão foram as seguintes:

Enterite e gastro enterite	222
Bronchite e broncho pneumonia	99
Tuberculose pulmonar	152, ou mais 5 que no anno proximo passado, correspondendo esta molestia a 5,2 por cento sobre a mortalidade geral do Estado.

Os Municipios que mais obitos de Tuberculose

deram forão os seguintes:

Capital	55	ou	1,09	por mil habitantes
Paranaguá	26	»	2,57	»
Morretes	17	»	2,85	»
Antonina	8	»	1,20	»
Colombo	8	»	2,25	»
Guaratuba	7	»	2,60	»
Pinhaes	6	»	0,39	»
Ponta Grossa	5	»	0,58	»
Lapa	4	»	0,20	»

Idades em que mais obitos deram-se:

0 a 1 mez	324
1 a 12 mezes	414
1 a 5 annos	659
5 a 10 annos	120
10 a 20 annos	155
20 a 30 annos	241
30 a 40 »	230
40 a 50 »	201
50 a 60 »	196

Dos fallecidos eram:

Solteiros 1976, casados 665, viuvos 239, ignorados 42, brasileiros 2628, estrangeiros 285, ignorados 9.

RECAPITULAÇÃO.

Realisaram-se 5642 nascimentos, registraram-se 1561 casamentos e 2922 obitos, havendo uma differença de 2720 a favor da população do Estado.

De Julho de 1901 a Junho de 1902
